

AD CAPITAL MARKETS
— ALWAYS ON THE MONEY —

The FX Partner That Turns Trades Into Travel

Foreign exchange is part of every deal, every shipment, and every margin calculation in the trade of mobiles, IT components, and consumer electronics. AD Capital Markets was built with that reality in mind.

Joining ITC Malta for the first time, AD Capital Markets brings a sharp, service-led FX solution tailored to international traders. The company delivers wholesale rates, zero transfer fees, and a loyalty programme that turns currency transactions into travel rewards - all backed by FCA authorisation and local banking access in regulated markets. Its purpose is clear: help businesses reduce FX friction, boost visibility, and unlock real value from one of the most overlooked operational levers.

FX Built for Traders, Not Just Transfers

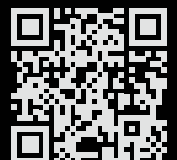

Founded in 2020, AD Capital Markets was created to streamline cross-border payments without compromising control or compliance. Its platform supports same- and cross-currency transactions in over 140 currencies, with local account capabilities in more than 90 key jurisdictions - including the UAE and the United States.

Where others redirect clients through departments, AD Capital Markets assigns a named contact and provides real-time tracking. That's not just customer service - it's operational clarity. Whether you're sourcing from Shenzhen or collecting from Milan, their infrastructure is designed to reduce delays, eliminate hidden costs, and give finance teams clear visibility across regions.

“Margins in this space are tight. We designed the service to give sourcing and finance teams better control - and a real return, even from something as operational as foreign exchange.”

- Antony Dann, Director

Earn While You Trade: The Avios Advantage

A standout feature of the platform is its exclusive partnership with Qatar Airways Privilege Club. Clients earn Avios points for every FX transaction - with no cap and no catch.

Programme highlights

- Use Avios with BA and Oneworld
- Welcome bonus for new clients
- Additional rewards for referrals and volume

Avios can be redeemed across the oneworld® alliance, covering business travel, upgrades, or personal flights. It's not a gimmick - it's a tangible reward built into something businesses already do every day.

"We wanted to offer something that genuinely gives back," says Antony. "If you're sending payments regularly, why not benefit beyond just the rate?"

Security, Simplicity, and Speed

Compliance is built in. AD Capital Markets is authorised by the UK's Financial Conduct Authority (FCA) and operates in over 90 jurisdictions via partnerships with tier 1 liquidity providers, and others.

The platform also supports fiat and crypto off-ramp/ on-ramp solutions - including USDT - making it a strong fit for fintechs and digital asset traders. Hedging and risk tools are available for businesses looking to manage exposure and protect their margins in volatile markets.

Onboarding is fast and tailored. Whether you're registered in the UK, EU, UAE, Asia, or Africa, AD Capital Markets adapts to the way you work. It's not built for a niche. It's built for the reality of global trade.

What AD Capital Markets Offers

Here to Connect - and to Reward

At ITC Malta, AD Capital Markets is here to talk, not pitch. Whether you're benchmarking FX costs, exploring faster settlements, or interested in the Avios programme, visit them at Stand B2 in the New Mobiles Area.

"Currency shouldn't just be a cost, it should give something back."

- Antony Dann, Director

To mark their debut, they're giving away a 100,000 Avios Points Prize - enough for a return business-class flight or multiple short-haul trips.
